

CNC Operator Setter | St Ives, Cambridge | £28,080-£31,200 | Monday to Friday | 2 Shift Pattern

We are delighted to be working with a specialist manufacturer that operates globally producing bespoke products. Reporting to the Workshop Supervisor/Manager you will set and operate the CNC machines in a safe and competent manner and to work as part of a team ensuring that production schedules for the Machine Shop are met.

The role primarily involves:

- To set and operate the CNC lathes or mills which you are assigned to, with the minimum of supervision.
- To run production jobs on the CNC machines and to carry out all inspection duties required to ensure that parts are manufactured correctly to drawing and meet tight deadlines.
- To ensure the ERP system and all paperwork is completed correctly and on time.
- Complete all associated documentation and ensure compliance with ISO9001 procedures.
- To make sure that any machine issues are reported to the relevant Team Supervisor or Machine Shop Manager.
- To follow the company's philosophy of lean manufacturing and look at ways to make improvements and then bring these to the attention of your team supervisor.
- To be responsible for keeping the areas you are working in and around, clean and tidy
- To ensure that all Health and Safety procedures are adhered to and work in a safe and competent manner.

Ideally you will have at least 3 years machining experience working in a similar industry and will understand the principles of G code CNC programs.
