

Senior Mechanical Assembler/Tester, St Ives, Cambridge, £27k, Monday to Friday/Days

A well-established manufacturing company based in St Ives providing products globally, is seeking a senior mechanical assembler to join a successful team working for company that invests in their people.

Ideally you will have a BTEC/Apprenticeship Level 3 or equivalent in either Mechanical or Electrical Engineering or similar calibre with exposure using hand tools with a high degree of manual dexterity and the ability to read technical drawings.

You will have significant exposure of assembling mechanical or electro-mechanical products to deadlines in a manufacturing environment using MS Excel, Word and ERP/MRP software packages to pick and use components and report progress.

Reporting to the Instrumentation Assembly Supervisor/Manager, you will be responsible for the assembly of precision mechanical and electro-mechanical components.

Key responsibilities include:

- Test the assembled products using the relevant hydraulic or electronic equipment to the required specifications.
- Use the ERP system during assembly to pick and issue components, update the progress of each job, and assign serial numbers where required.
- Work to deadlines and meet output and productivity measures.
- Be proactive, providing ideas for continuous improvement projects.
- Follow health and safety policy, highlight any health and safety issues to line management.
- Complete all associated documentation and ensure compliance with ISO9001 procedures.

The business offers an excellent work environment with competitive benefits that include a discretionary annual profit share scheme, 24 days holiday plus bank holidays, life assurance and pension.

You will be working with a passionate team and company, who value their people as an asset and have the very latest cutting-edge technology, systems and production facility.
